

About MINRIS

Mineral Resource Intelligence System (MINRIS) is being developed as an Android and IOS Mobile Software Application to meet the Global Research and Analysis needs of various stakeholders in the Mines, Metals & Energy Industry. Target User base include Mining Companies, Commodity Traders, Government and Private Research Organisations, Investors.

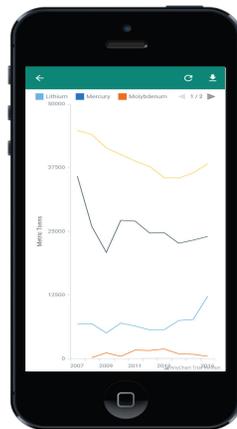

What does MINRIS offer to its Users?

- ✓ Availability of Large Datasets covering Import, Export and Production trends for Raw Materials globally traded in 120+ countries across the globe.
- ✓ Allows Users to download data and create interactive charts for observing historic trends of Commodity volume traded in past 40 years.
- ✓ A Dedicated Directory and Library of Information for 120+ Countries related to Government Policy and Legislations, List of Mines, Mine locations, Production Capacity and Mine ownership in all these countries.
- ✓ Provides useful links of Relevant Reports and Government Websites for mine developers of a particular country to understand the industry status and procedures for mine operation.
- ✓ A Dedicated News Feed providing insights on Global commodity markets which is being updated every 5 minutes.
- ✓ Facility to request for Customised Data and Information related to Mines, Metal & Energy Industry exclusively from Minpol Experts directly at a reasonable fees

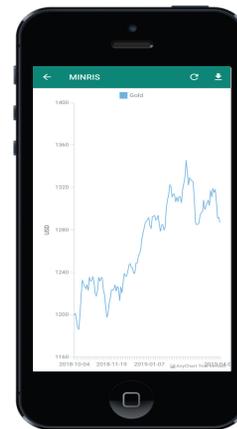

1

Historical Production, Import-Export Data & Trends for Mineral Commodities

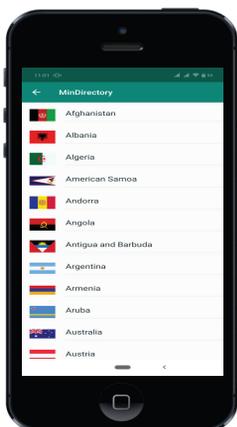

2

Production Trend comparison of multiple mineral commodities in a country

3

Price Data & Trends for Mineral Commodities traded at Global scale

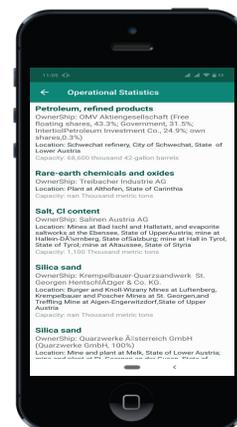

4

Dedicated Country Directory with exhaustive information about Mining Sector and Policies in 120+ Nations

5

In this example Austria is selected and country profile has information on Policy, Legal, Ministry, Application procedure, Mineral Resource etc.

6

Information related to List of Mines in a Country and details about their location, capacity and operating companies

MINRIS-Overview

Data and interactive charts for covering Import, Export and Production trends for Raw Materials in MME sector globally traded in 120+ countries across the globe

Commodity wise and Country wise comparison of Price, Production and Recycle volume of MME products

Provides Users access to Minpol experts and place request for Customised Data & Information for a negotiable cost

Dedicated Directory and Library of Information for users to view and download 120+ Countries related Government Policy and Legislations, List of Mines, Mine locations, Production Capacity and Mine ownership information and statistics

Other features such as About us, Feedback, Logout from App and Disclaimer with information about terms of services

Provides information on Annual Subscription package and link to make purchase

MINRIS-Features

LIST OF FEATURES	DESCRIPTION
Global News Feed	A news feed for latest Mines, Metals & Energy (MME) News from around the globe
MineStats	This feature provides Data and interactive charts for covering Import, Export and Production trends for Raw Materials in MME sector globally traded in 120+ countries across the globe.
MinAnalytics	This feature provides for Commodity wise and Country wise comparison of Price, Production and Recycle volume of MME products
MinDirectory	A Dedicated Directory and Library of Information for users to view and download 120+ Countries related Government Policy and Legislations, List of Mines, Mine locations, Production Capacity and Mine ownership information and statistics
Request Services	This feature provides Users access to Minpol experts and request for Customised Data & Information for a negotiable cost
Subscription	Provides information on Annual Subscription package and link to purchase
Miscellaneous – Other Features	Other features such as About us, Feedback, Logout from App.

About Company

MINPOL - Agency for International Minerals Policy is a spin-off company of the University of Leoben, Austria, and was established as a private limited partnership (KG) according to Austrian law on June 15, 2012. In May 05, 2016, MinPol has been Re-established as a private limited company (GmbH) in Austrian law.

Mission & Vision

The Interdisciplinary European research institute MINPOL aims to link researchers from different scientific disciplines and business experts in order to pursue and support mineral resources concepts and management world wide both in applied research and project implementation.

Expertise and Services

MINPOL's core fields of expertise deal with ecological and economic as well as social, cultural and political issues in the context of mining, which include:

- ✓ Development of minerals policy frameworks
- ✓ Minerals industry consulting services
- ✓ Mineral market research
- ✓ Geological research
- ✓ Legal basics of minerals policy
- ✓ Data processing and simulations
- ✓ Monitoring of policy impacts and implementation
- ✓ (Research) Project co-ordination
- ✓ Trainings, workshop organization
- ✓ Social licensing processes
- ✓ Lectures and presentations
- ✓ Minerals trading

Kwabena Ata MENSAH
Geologist, Natural Resources
Governance Expert

COO Chile
José Martín CABELLO
LECHUGA
Economic Geology and QCP

Operations Head, New Delhi,
India
Utkarsh AKHOURI
Mining Engg & Financial Engg

Operations Manager,
Central Asia
Ira SOKOLOVA

MINRIS App Development Team

Utkarsh Akhouri

- Head of Product Development
- Masters in Financial Engg. & Bachelors in Mining Engg, Indian Institute of Technology Kharagpur
- 5 Year Experience in Mines, Metals and Energy Sector

Suresh Sharma

- Lead Front End and Design Developer
- 6+ Years of Experience in Android Development . Working on Java and Kotlin

Jagjeet Singh

- Lead Back End Developer and Server Manager
- Master of Computer Applications Punjab Technical University
- 7+ years of Experience in Software Development, Web application development & Linux

Neeraj Giri

- IT Advisor - Server Development
- Final Year Undergraduate Student, Indian Institute of Technology, Kharagpur
